Winter 2025!

Dear Colleagues,

Welcome to a new year! The Department of OBGYN & RS remains steadfast in our focus to advance women’s health through trailblazing research, compassionate clinical care, and pioneering education of trainees, while embracing and advocating for our broad community.

We are thrilled to announce the celebratory ribbon-cutting opening of our new Obstetrics and Gynecology Clinic on Genesee in La Jolla, focusing on gynecological services, including complex family planning services and minimally invasive gynecological surgery (MIGS) – to match growing demand for top-of-the-line clinical services. UC San Diego Health remains the #1 health care provider in the region and tied for #1 in the state, and our department was recently recognized by U.S. News and World Report as one of the "Best Hospitals for Maternity Care" for the third year in a row ([U.S. News »](#))!

Our Center for OB/GYN Research Innovation ([CORI »](#)) is forging ahead, with its 5 hubs providing support for new women’s health research endeavors.

The Culture & Justice Quorum hosted an MLK Reception and a UC San Diego Health Birth Community Engagement & Symposia: Community Participation in Research strengthening partnerships between UC San Diego Health’s Department of Obstetrics, Gynecology, and Reproductive Sciences and our valued community partners to foster equitable and meaningful research initiatives.

In this volume of the Fimbria, we spotlight the lab of Miles Wilkinson, PhD, an award-winning researcher and Distinguished Professor in the Division of Reproductive Endocrinology. Our clinical spotlight for this edition is Obstetrics Refugee and Asylee Case Navigation program led by Audra Meadows, MD, MPH and Eliza Garay, BA, advancing equitable access to obstetric care.

Each year, we publish a new edition of our department CV, the list of accomplishments of department faculty in the last year. The updated CV for 2024 is listed [here](#).

Visit our [website](#) for more information on our divisions, clinical programs, novel research, and varied educational offerings. Please enjoy this issue, and email us with any feedback to Fimbria@ucsd.edu.

Thank you!

Cynthia Gyamfi-Bannerman, MD, MS

Samuel SC Yen Endowed Chair

Department Chair, Obstetrics, Gynecology, and Reproductive Sciences

Professor, Maternal-Fetal Medicine, Obstetrics and Gynecology

LABORATORY IN THE SPOTLIGHT

Featuring OBGYN & RS Groundbreaking Research Endeavors

MILES WILKINSON, PhD, primarily studies the convergence of FERTILITY with GENE REGULATORY CIRCUITS

Miles Wilkinson, PhD

Dr. Wilkinson's Lab Team

LABORATORY IN THE SPOTLIGHT *Featuring OBGYN & RS Groundbreaking Research Endeavors*

Bored by his Biology class in high school in Oregon, Dr. Wilkinson's first real excitement about science didn't come until his 3rd year as an undergraduate at UCSB (in the late 1970s) when he learned about molecular biology. Feeding this interest were courses he took earlier on Physical Anthropology and Nutrition, where he learned about genetic mutations, primate evolution, and the Krebs (citric acid) cycle. Fueled by these various interests, Dr. Wilkinson did a full-time Honors course in Genetics for his final year of undergraduate studies at the University of Edinburgh, only 2 miles from where he was born. His Honor thesis project was focused on transposable elements (a topic he returned to recently that was made famous by the Nobel Prize winner, Barbara McClintock, who initially struggled to have her findings on "jumping genes" accepted).

Dr. Wilkinson then moved "down south" to University of Warwick in England to do his PhD studies. His initial interest was to do his dissertation on a "new topic" (at the time) of "genetic engineering," but his experiments took a turn and he ended up doing a cellular immunology project involving a potential cancer cure. Working in the UK was exciting, as it gave Dr. Wilkinson opportunities to attend conferences all across Europe. His PhD training gave him a foundation in immunology, which turned out to be critical for landing his first two faculty jobs, both of which required him to be the course director of different immunology courses (for medical, nursing, and graduate students).

The seeds of Dr. Wilkinson's current research

Dr. Wilkinson's first post-doctoral position (in 1984) involved his traveling "across the pond" from Warwick, England to The Scripps Research Institute (TSRI) right here in San Diego. He chose to study underlying mechanisms causing breast cancer at TSRI but was disillusioned by the large lab (65 people!) and associated chaos. So, Dr. Wilkinson elected to quickly leave and do a second postdoc (in 1985) at the UCSD Cancer Center, which at that time was in Hillcrest. Working under the leadership of Dr. Carol MacLeod, Dr. Wilkinson focused on two main projects that he still works on (in highly "mutated" form") today.

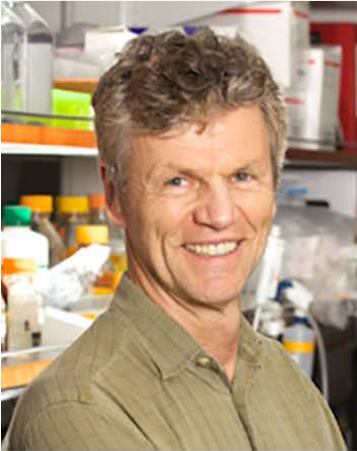

One project involved cloning new genes, since at that time, "the genome" was not sequenced. Among the genes cloned by Dr. Wilkinson was an "oncofetal" gene that he named "reproductive homeobox gene on the X chromosome (RhoX)-5." After he moved to Oregon Health Sciences University (OHSU) as an Assistant Professor, his team discovered that RhoX5 encodes an important transcription factor that is specifically expressed in the reproductive tract. These studies led Dr. Wilkinson down the reproductive biology path, a field of investigation he has focused on ever since.

A major breakthrough made by Dr. Wilkinson's team after moving to M.D. Anderson Cancer Center (in 1994), was that RhoX5 is not an orphan homeobox genes (as Dr. Wilkinson originally thought), but instead it is part of a large gene cluster – indeed, it is the largest homeobox gene cluster in mammals. This finding has shaped much of his laboratory's work since then. The entire 33-gene RhoX cluster is selectively expressed in the male and female reproductive tracts (as well as placenta), leading to his laboratory's over-arching hypothesis that the genes in this giant X-linked cluster encode transcription factors devoted to regulating functions in reproduction. Testing this hypothesis has led Dr. Wilkinson's team to focus on spermatogonial stem cells (SSCs), which his team works on still today ([discover Wilkinson lab](#)). SSCs are a potential cure for some forms of infertility.

The other project that Dr. Wilkinson worked on as a post-doctoral fellow was "immune gene regulation." This project was focused on T-cell receptor (TCR) genes, which had only just been cloned at the time. Dr. Wilkinson discovered that a weird mechanism was negatively regulating non-productively rearranged TCR genes, but he couldn't figure out what the mechanism was. Not daunted by the challenge, Dr. Wilkinson continued working on this problem as an Assistant Professor at OHSU, where he and his team discovered that "the negative regulation" was a RNA decay mechanism that degrades "bad" mRNAs as well as an interesting subset of normal mRNAs. This RNA turnover mechanism—later named "nonsense-mediated RNA decay (NMD)—has fascinated Dr. Wilkinson ever since. Several current projects in the laboratory revolve around the NMD pathway, including ascertaining its roles in germ cells and human evolution, as well as determining whether therapeutic manipulation of the NMD pathway can treat genetic diseases caused by nonsense and frameshift mutations ([explore Wilkinson lab](#)).

Dr. Wilkinson's Lab Team

Current Research Interests

Dr. Wilkinson lab research interests encompass infertility, germ cells, stem cells, neurons, transcription, and RNA regulation. Explore Dr. Wilkinson's publications and discover latest research into lab grown sperm, gene-editing children, and therapeutic cures for male infertility.

WILKINSON LAB RESEARCH PUBLICATIONS

“There is huge interest in SSCs, not only because of their unique stem cell qualities, but because they have the potential to cure male infertility. Towards developing SSC therapy, we have embarked on answering broader questions about SSCs using single-cell RNA-seq (scRNAseq) analysis which has allowed us to define developmental steps by which SSCs form in mice and humans.” – Miles Wilkinson, PhD

Dr. Wilkinson Lab Research: Single-cell RNA-sequencing (scRNAseq) analysis defines human spermatogonial cell subsets

Thank you, [Dr. Wilkinson Lab](#) for your steadfast dedication to discovering cures and masterminding therapies most critical to reproductive medicine and debilitating disease in human development.

CLINICAL INNOVATIONS

OBGYN & RS State-of-the-Art Programs Advance Patient Care

OBSTETRICS (OB) REFUGEE and ASYLEE CARE NAVIGATION PROGRAM

The Essential Role of Community Collaboration in Health Equity

UC San Diego Health collaborates with our community to provide the Obstetrics (OB) Refugee and Asylee Case Navigation Program to deconstruct inequalities in disadvantaged vulnerable populations with increased susceptibility to socioeconomic impediments hindering ability to obtain high quality obstetrics care. Inclusive, efficient, and culturally aware healthcare is offered to our pregnant refugee and asylee patients. Launched in 2022 in response to escalating need, this transformative program assists with pediatric care for newborns in conjunction with providing infant care necessities (diapers, car seats, baby apparel, breast pumps, etc.). Prenatal through postpartum care advances equity for our patients while aiding community wellbeing.

OB Refugee and Asylee Care Navigation Leadership

The [OB Refugee and Asylee Care Navigation Program](#) is led by Director Eliza Garay, BA and Faculty Lead Dr. Audra Meadows, Vice Chair for Culture and Justice. This program was honored with UCSD's 2025 Inclusive Excellence Award, reflecting our dedication to fostering inclusive, community-centered reproductive health care for refugee and asylee patients. This work is central to our mission and reflects our ongoing commitment to culture and justice.

Audra Meadows, MD, MPH

Vice Chair of Culture and Justice in the Department of Obstetrics, Gynecology & Reproductive Sciences, Faculty in Obstetrics and Gynecology, UME Special Director for Health Equity and Systems Science, and Adjunct Professor, Herbert Wertheim School of Public Health and Human Longevity Science.

Maria (Eliza) Garay, BA

OB Refugee and Asylee Care Navigation Program Director, Ob/Gyn Surgical and Support Services Manager, Women and Infant Services.

Program Overview

Rooted in equitable clinical innovation, the OB Refugee and Asylee Case Navigation Program bridges obstetrics care with patients who identify as a refugee or asylum seeker. At the heart of this program is the essential aspect of language and interpreter assistance where patients and their families clearly communicate to providers and care team in their native language. In most cases, our diverse and global cultures sensitive staff are proficient in patient dialects and can communicate effectively, breaking down barriers to miscomprehension. Nonverbal, visual-based communication tools are adopted to reduce ambiguity and foster rapport. To date, over 130 patients have benefited from this successful program.

CLINICAL INNOVATIONS

OBGYN & RS State-of-the-Art Programs Advance Patient Care

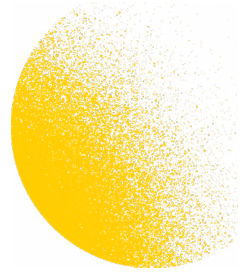

The pioneering approach guides pregnant patients through the UC San Diego Health Care system and assists with access to pregnancy related services and information. Individual guidance ensures prenatal and follow-up care is available. To enhance patients' healthcare experience, this program assists patients with acquiring appropriate social services and helps locate resources and support to meet vital needs. These social services include the University of California Health's Milk Bank for donated breastmilk. Human milk provides nutritional nourishment and protects and improves infant survival against necrotizing enterocolitis (NEC). Donations are ongoing and much appreciated to make measurable impact.

Khatira Sarferaz and Eliza Garay exhibit OB Refugee / Asylee Care Navigation program at the CJQ Living Library

A first-hand powerful story of a mother's love, strength, and resilience as a refugee turned rescuer from our UC San Diego OB Refugee/Asylee Care Manager caring for our community:

"From fleeing conflict to fostering hope, my journey as a refugee fuels my passion at UCSD's OB Refugee/Asylum Case Navigation Program. Here, I assist fellow refugee moms in embracing prenatal care, guiding them through pregnancy, and navigating the complex health system with care and compassion.

Every step I take alongside these resilient women reminds me of the strength of motherhood and the power of support in shaping bright futures. I'm deeply thankful to UCSD for providing this vital program, allowing us to extend a helping hand to those who need it most." – Khatira Sarferaz, OB Refugee/Asylee Care Navigation Program Manager

Eligibility and Program Access

For UC San Diego Health patient referral process and program eligibility, please visit our tip sheet for step-by-step system process for UCSD providers to refer a patient and create a consult in EPIC. Patients in the hospital (triage and inpatient) or in UC San Diego Health clinics can be referred. To refer a patient outside of the UCSD system, please contact: OBRefugee@health.ucsd.edu to determine eligibility.

[Culture and Justice Quorum](#) presentations with tandem Q&A discussions by Dr. Meadows and Eliza Garay's esteemed team at quarterly outreach events – open to birth care providers and the broader community – has been effective at sharing the OB Refugee and Asylee Case Navigation program in clinically underserved areas.

Thank you, Dr. Meadows and Eliza Garay, PM, for optimizing maternal and infant health outcomes, eliminating inequalities to obstetrics care, and adding value to innovative health equity clinical practice.

CULTURE & JUSTICE

OBGYN & RS Culture & Justice Quorum (CJQ) Spearheads Inclusive Excellence

What is the Culture and Justice Quorum?

Housed within the UC San Diego School of Medicine, the Culture and Justice Quorum, led by Audra Meadows, MD, MPH, Vice Chair of Culture and Justice, was established to ensure our department excellence is inclusive and a place where everyone can thrive. The Quorum is a foundational, departmental racial equity and justice committee designed to take an action-oriented approach to create and sustain department-level initiatives that foster a culture of equity and justice and encourage anti-racist work.

Discover our value statement, explore our opportunities to participate, and visit our website. The Culture & Justice Quorum offers educational CME credit for medical students and residents. CJQ hosts informative Grand Rounds and invites health care experts to present on specialty topics followed by Q&A session. Interested in joining and becoming an ambassador? Contact cultureandjustice@health.ucsd.edu and attend our quarterly meetings for opportunities to become involved. The CJQ is excited to announce Chelsea Saelee as the new Manager for CJQ happenings.

Reverend Martin Luther King, Jr. Parade and Reception

The CJQ hosted its annual MLK Reception with refreshments for the department at the East Campus Office Building on January 22, 2025 to celebrate the inspiring life and legacy of Reverend Dr. Martin Luther King, Jr. Cynthia Gyamfi-Bannerman, MD, MS, Audra Meadows, MD, MPH, and CJQ ambassadors joined Barbara Jung, MD, new Associate Vice Chancellor and Dean of the UC San Diego School of Medicine, and Patty Maysent, UC San Diego Health CEO (not pictured), to march with the UC San Diego Health team at the San Diego MLK Parade.

Cynthia Gyamfi-Bannerman, MD, MS and Barbara Jung, MD, new Associate Vice Chancellor and Dean of the UC San Diego School of Medicine, marching with the UC San Diego Health team at the MLK Parade.

CJQ – CORI Meeting

The Department of Obstetrics, Gynecology, and Reproductive Sciences held its quarterly Birth Community Engagement and Research Symposium: Community Participation and Research moderated by Audra Meadows, MD, MPH at the Tubman Chavez Center on January 24, 2025. Our [Center for OB/Gyn Research Innovation](#) made a grand debut presentation to the community. With representation by Healthy Start, Global Communities, and the San Diego County Maternal Child Health (MCH) Team, the goal was to bring together community organizations, health-care clinicians and researchers to discuss strategies for engaging with communities, fostering diversity, building relationships, and cultivating trust to improve research outreach and promote health equity. Other program highlights included:

CULTURE & JUSTICE

At Your Cervix

At Your Cervix 2024-2025 Resident leads:

Diversity, Equity, & Inclusion Lead: Rafa Ifthikhar, MD

Advocacy Lead: Jess Rivas, MD

Community Engagement and Service Lead: Milli Desai, MD and Allison Rajan, MD

This issue of Fimbria's At Your Cervix highlights Residents' Holiday Drive

FEEDING SAN DIEGO Holiday Drive

The OBGYN & RS residents and department partnered with local charity, Feeding San Diego, over the holidays. The Feeding San Diego Marketplace is located at UCSD's Sorrento Valley headquarters. The goal was to offer a dignified shopping experience for families in need. This welcoming space allows community members, approximately 380 households per week with 40% identifying as Filipino, to shop once a month for no-cost groceries, including dry goods, frozen protein, and fresh produce. Designed with families in mind, the Marketplace helps parents and caregivers select foods that meet their household's preferences and nutritional needs, ensuring access to healthy, satisfying meals. Around the holidays, generosity and giving spices and baking ingredients through "Spice Up the Pantry" made a difference in the lives of the people who shop there because their meal times with loved ones were more exciting and flavorful.

OBGYN & RS Residents' contribute to Feeding San Diego Holiday Drive

NEW FACULTY HIRES

Welcome to the Department of OBGYN & RS! We're delighted to have you join the team!

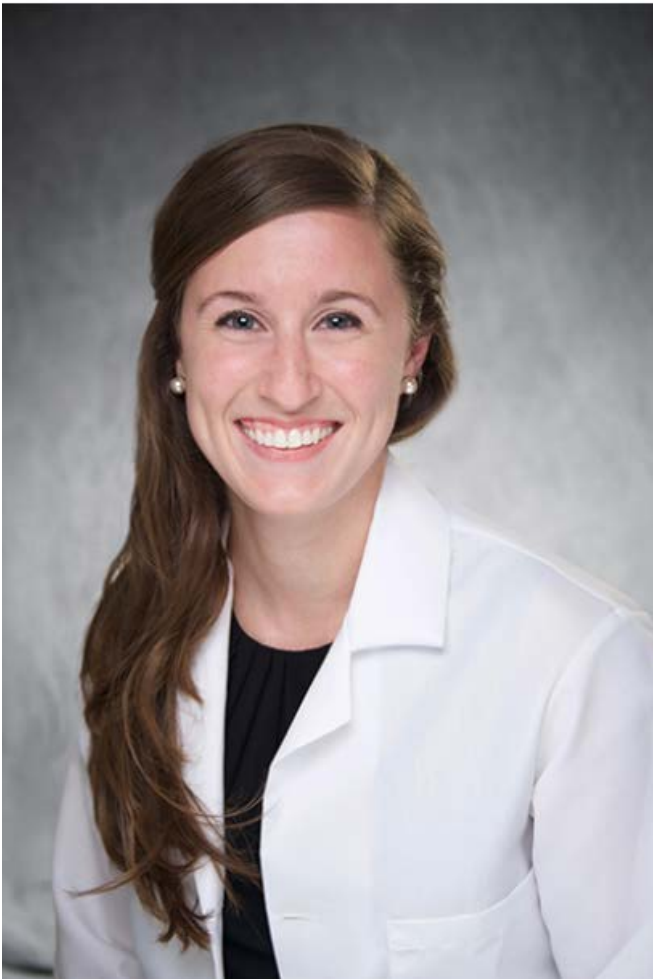

Laura Biver, MD

Obstetrics and Gynecology (Generalist) division

Dr. Laura Biver received her Bachelor of Arts and Master's in Public Health degree from University of Virginia. She completed her medical school training and residency at George Washington University School of Medicine and Health Sciences in July of 2024. At GW, she developed an interest in sexual medicine. She plans to continue her education and development of skills in this field. She is new to San Diego area and will be joining the Generalist Division.

NEW FACULTY HIRES*Welcome to the Department of OBGYN & RS! We're delighted to have you join the team!***Selemawit Ghebrendrias, MD****Obstetrics and Gynecology (Generalist) division**

Dr. Ghebrendrias returns to join the department after having had completed her residency in obstetrics and gynecology at UCSD in 2022. While in residency she was involved in a number of community outreach efforts and spearheaded a host of programs aimed at improving access to quality care for the underserved in San Diego County. Her research focused more specifically on refugee health and the uptake of preventative gynecologic services. From 2022 to 2023 she volunteered as a general obstetrician gynecologist in Asmara, Eritrea and subsequently served from 2023 to 2024 as head of the maternal and gynecology wards of the regional referral hospital in Keren, Eritrea. She is excited now to return to the UCSD family.

**Rachel Whynott, MD****Reproductive Endocrinology and Infertility division**

Dr. Rachel Whynott joins the faculty after serving as an assistant professor and associate fellowship director for the reproductive endocrinology and infertility division at the University of Washington. She completed her fellowship in reproductive endocrinology and infertility at the University of Iowa, and her residency in obstetrics and gynecology at the University of South Florida, where she served as administrative chief resident. She serves as a liaison for the American Society for Reproductive Medicine to the American Medical Association and is highly involved in advocacy. Her research interests include mental health and wellness during infertility testing and treatment, as well as health disparities in fertility medicine. She enjoys spending time at the beach, exploring both locally and abroad, and dreams of using her undergraduate degree in zoology and knowledge of reproduction to join conservation efforts at the San Diego Zoo.

International Fundamentals of Critical Care Support: Obstetrics course in Riyadh

Scott Harvey was recently invited to Riyadh to teach at the Kingdom of Saudi Arabia's Ministry of National Guard Health Services. In 2023, the Ministry completed the construction of a women's hospital as part of its university expansion. Scott, along with two colleagues from Pennsylvania, was recruited to lead a two-day course on *Fundamentals of Critical Care Support: Obstetrics* for a multidisciplinary group of learners. The course combined didactic lectures and hands-on simulations, focusing on obstetric critical care and tailoring provisions to meet patient needs. Additionally, Scott participated in meetings to review hospital protocols, processes, and strategies for advancing staff, resident, and attending education. This collaboration marks a significant step toward the hospital's vision of becoming the leading women's health center in the Arab world. Lastly, he gave Grand Rounds on Obstetrics Hemorrhage and Thromboelastography to the hospital system, which included the seven campuses around the kingdom that televised the event. Next UCSD FCCS OB course is October 17-18, 2025 at UCSD!

UC San Diego Health

Announcing UC San Diego Health's Comprehensive Two-Day Doula Training Program for Refugee/Immigrant Community Members

Supporting Maternal Health in our Most Impacted Communities

UC San Diego Health's OB Refugee/Asylee Care Navigation Program and Volunteer Doula Program, in collaboration with the Refugee Health Unit (RHU) within the University of California San Diego Center for Community Health ACTRI, is excited to announce the launch of our **Comprehensive Two-Day Doula Training Program**, specifically designed for **refugee and immigrant community members**. This new initiative aims to empower individuals with the skills, knowledge, and confidence needed to support maternal health in their own communities.

The program is designed for individuals who speak multiple languages and are passionate about providing culturally competent care to families navigating pregnancy, labor, and the postpartum period within a complex healthcare system. Through this immersive training, participants will gain a deep understanding of the doula role, while developing practical skills to support expectant parents during one of life's most transformative experiences.

Doulas play an essential role in improving maternal and child health by providing emotional, physical, and informational support to families during pregnancy, labor, and the postpartum period. This training is specifically designed to meet the needs of refugee and immigrant populations, who often face significant barriers to accessing healthcare and culturally sensitive support. By training bilingual and culturally competent doulas, we aim to bridge the gap in maternal healthcare services and improve outcomes for families in our diverse communities.

UC San Diego Health and The Refugee Health Unit are committed to improving maternal health care and providing critical resources to underserved populations. This training program is an important step in fostering a supportive, inclusive, and culturally aware healthcare environment for all.

**JANUARY 31st, 2025
and FEBRUARY 1st, 2025**

For information contact: Eliza Garay, OB Refugee/Asylee Care Navigation Program Manager at: megaray@health.ucsd.edu or April Ricotta, RN, CNM, MSW, Program Manager – Doula Services at: aricotta@health.ucsd.edu

UC San Diego Health Doula Training Program

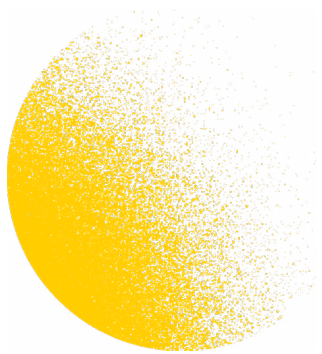

The OB Refugee/Asyles Care Navigation Program and Volunteer Doula Program recently held a Doula Training Program for refugee/immigrant community members to support maternal health in our most impacted communities.

ACOG Annual District Meeting

The ACOG Annual District Meeting was held in Waikiki, Honolulu, Hawaii. Maureen Ries, MD served as the Scientific Program Co-Chair.

Inaugural Women's Health Symposium - Save the Date

April 16, 2025, from 12:30-5:30pm

The UC San Diego Department of Obstetrics, Gynecology, and Reproductive Sciences and our new Center for Ob/Gyn Research Innovation will be hosting the inaugural Women's Health Research Symposium on April 16, 2025, from 12:30-5:30pm at Sanford Consortium for Regenerative Medicine. The main goal of the symposium is to bring together partner research groups across UC San Diego to feature research innovations and resources to further promote team science for advancement of women's health research and health equity. Please, join us for exciting research presentations and flash talks highlighting various UC San Diego research programs, followed by the reception.

UROBIOME 2025

On behalf of Linda Brubaker, MD, Professor of Obstetrics, Gynecology & Reproductive Sciences at UC San Diego, we announce the **2025 Urobiome Conference** on February 24.

Researchers will present the emerging science of the **UROBIOME** and its recently discovered implications for human health, including common conditions such as urinary tract infection, urinary incontinence, and bladder overactivity.

Registration: \$275

FEB 24TH, 2025

Location:
UC San Diego, Scripps Institution of Oceanography
Robert Paine Scripps Forum for Science

FUNDAMENTAL CRITICAL CARE SUPPORT: OBSTETRICS

SAVE THE DATE
Registration opens
March 1st, 2025

CONFERENCE DATE: OCT. 17-18, 2025

UCSD Simulation Training Center
UCSD Medical Education and Telemedicine Building
For more information contact the course director:
Scott Harvey, MD, MS, FACOG, FCCM
Dual Board Certified in Obstetrics and Surgical Critical Care
Associate Clinical Professor
Assistant Director of Obstetrics
sharvey@health.ucsd.edu

The **Fundamental Critical Care Support (FCCS): Obstetrics** course is designed for intensivists and non-intensivists who may provide maternal /fetal critical care and for clinicians in obstetrics seeking additional education in critical care.

The FCCS-OB course provides a combination of didactic lectures and hands-on skills stations with an emphasis on pregnant patients. The two-day, comprehensive curriculum offers an approach to initial management of the critically ill obstetrics patient for providers not formally trained in critical care.

Participants will learn useful information about the extended care of critically ill obstetrics patients, especially care related to mechanical ventilation, monitoring, organ hypoperfusion and neurological support. Providers will receive guidance for acute problems encountered in the ICU and for sudden obstetrics patient deterioration.
